

# Honeywell

January 11, 1983

Mr. Robert Dahlgren  
1405 6th Street S.E.  
Minneapolis, MN 55414

Dear Bob:

As you are finishing your undergraduate work at the University of Minnesota, it is appropriate to recognize your contribution to our research programs. I have no hesitation in recommending you to prospective employers as a capable engineer. Please feel free to use this letter in your employment application process.

The most significant characteristics of your work at the Systems and Research Center are innovation and energy. I was impressed with your thoughtful solutions to problems. An example of this work is your new planar fiber optic switch concept which we adopted for our fail safe fiber optic bus project. Your previous work in Honeywell's Solid State Electronics Division mask shop and in the Avionics Division laser gyro group have provided valuable experience for you.

The technical achievement award you received last year is evidence of your effectiveness. It is significant that this was accomplished on a 20 to 40 hour week while carrying a full class load at the University of Minnesota.

Sincerely,

Gordon L. Mitchell  
Sr. Principal Research Scientist
